WORKSHOP NOTES:

Each student who successfully completes this workshop will receive all training materials (PowerPoint presentations, workbooks, video's, forms, etc.) and will be certified to teach all of the Crime Free Programs. This workshop is being presented by the creator and founder of the Crime Free Programs and the International Crime Free Association. This workshop will be taught from the perspective of why and how each of the Crime Free Programs were developed. This workshop will focus on the inception and evolution of the Crime Free Programs. It will not focus on the nuances of each state's current statutes.

Regular breaks will be taken throughout the daily morning and afternoon sessions, at the instructor's discretion. While some students prefer hourly breaks others prefer fewer breaks, therefore the breaks will be determined by consensus and common sense, based on the extent of Q&A's in each segment. Therefore, this schedule is only a guideline. Times and topics may change slightly as needed, to facilitate the maximum effectiveness of classroom time.
